March 18-24, 2018

## WATER WEEK IN KENTUCKY

World Water Day (March 22, 2018) is a day to raise awareness and inspire action to tackle water and sanitation issues. Every year, UN-Water proposes a theme for [World Water Day](#) corresponding to a current or future challenge.

## NATURE FOR WATER

World Water Day 2018 'Nature for Water' will focus on showing the potential of nature-based solutions for water issues and how they can be considered for water management policy and practice.

Explore the KY Water Week website to learn ways that individuals, businesses and communities are using natural solutions to address water issues in their areas, and find out how you can help protect clean water!
